

Roller Shades Green Info Sheet

Green Properties of Roller Shades

- Roller Shades block the sun's heat, preventing solar heat gain in the summer and reducing heat loss in the winter by creating an insulating buffer between your home and the outdoors. This insulating effect reduces energy consumption and lowers energy bills.
- By blocking out the sun's UV rays, Roller Shades also prevent damage to furniture, flooring and belongings thereby protecting the durability of your home.
- Roller Shades carry a limited-lifetime warranty. These shades are designed, engineered and tested for long life, reducing landfill waste.

Eco-Friendly Raw Materials

- Several of the Roller Shades fabrics are certified with the *Oeko-Tex Standard 100: "Confidence in Textiles"* label. This verifies that the fabrics are free of PVC, Halogen, Lead, Formaldehyde, allergenic dyes, pesticides, phenols, heavy metals, among others.
- Many of the components of this product are recyclable, including aluminum tube and hem bar. Plastic components in Roller Shades contain up to 50% pre-consumer recycled material.
- Corrugated cardboard is used to package all products and is 100% recyclable. The cardboard itself contains 35-40% recycled content. The angle board used to reinforce the cardboard is 100% recyclable and contains 80% post-consumer recycled material and 20% pre-consumer recycled material. Poly tubes, EPS pads, parts tub and bubble wrap used in packaging are also 100% recyclable.
- Custom box-cutting machines are used to cut each box to the exact size of the shade. This process eliminates wasted cardboard and packing materials and minimizes shipping energy.

Springs Window Fashions is proud to be affiliated with the following organizations that share our vision of sustainability and responsibility:

Green by Nature is Springs Window Fashions' commitment to the environment.

Bali® is a brand of SPRINGS WINDOW FASHIONS the Best Experience company
