

Roman Shades Green Info Sheet

Green Properties of Roman Shades

- Roman Shades block the sun's heat, preventing solar heat gain in the summer and reducing heat loss in the winter by creating an insulating buffer between your home and the outdoors. This insulating effect reduces energy consumption and lowers energy bills.
- By blocking out the sun's UV rays, Roman Shades also prevent damage to furniture, flooring and belongings thereby protecting the durability of your home.
- Roman Shades carry a limited-lifetime warranty. These blinds are designed, engineered and tested for long life, reducing landfill waste from short-lived products.

Eco-Friendly Raw Materials

- Several of the Roman Shade fabrics are certified with the *Oeko-Tex Standard 100: "Confidence in Textiles"* label. This verifies that the fabrics are free of PVC, Halogen, Lead, Formaldehyde, allergenic dyes, pesticides, phenols, heavy metals and more.
- Many of the components of this product are recyclable, including the aluminum headrail and plastic components. Plastic components in Roman Shades contain up to 50% pre-consumer recycled material.
- Corrugated cardboard is used to package all products and is 100% recyclable. The cardboard itself contains 35-40% recycled content. The angle board used to reinforce the cardboard is 100% recyclable and contains 80% post-consumer recycled material and 20% pre-consumer recycled material. Poly tubes, EPS pads, parts tub and bubble wrap used in packaging are also 100% recyclable.
- Special tubes used to keep the fabric shape intact during shipping are 100% recyclable.
- Custom box-cutting machines are used to cut each box to the exact size of the blind. This process eliminates wasted cardboard and packing materials and minimizes shipping energy.

Springs Window Fashions is proud to be affiliated with the following organizations that share our vision of sustainability and responsibility:

Green by Nature is Springs Window Fashions' commitment to the environment.
