

Graber® Aluminum Blinds Green Info Sheet

Green Properties of Graber Aluminum Blinds

- Aluminum Blinds block the sun's heat, preventing solar heat gain in the summer, and reducing heat loss in the winter by creating an insulating buffer between your home and the outdoors. This insulating effect reduces energy consumption and lowers energy bills.
- By blocking out the sun's UV rays, Aluminum Blinds also prevent damage to furniture, flooring, and belongings thereby protecting the durability of your home and reducing prematurely sending damaged products to a landfill.
- Aluminum blinds carry a limited lifetime warranty. These blinds are designed, engineered and tested to ensure a long life, reducing landfill waste from short lived products.

Eco-Friendly Raw Materials

- Aluminum slats are 100% recyclable. The aluminum headrail and plastic components are 100% recyclable as well.
- Corrugated cardboard is used to package all products and is 100% recyclable. The cardboard itself contains 35-40% recycled content. The angle board used to reinforce the cardboard is 100% recyclable and contains 80% post-consumer recycled material and 20% pre-consumer recycled material. Poly tubes, EPS pads, parts tub and bubble wrap used in packaging are also 100% recyclable.
- Custom box cutting machines are used to cut each box to the exact size of the blind. This process eliminates wasted cardboard, packing materials and shipping energy.

Green by Nature is Springs Window Fashion's commitment to the environment.

Graber is a brand of SPRINGS WINDOW FASHIONS the Best Experience Company
