

Graber® Traditions® Composite Blinds Green Info Sheet

Green Properties of Composite Blinds

- Composite Blinds block the sun's heat, reducing solar heat gain in the summer. This insulating effect reduces energy consumption and lowers energy bills.
- By blocking out the sun's UV rays, Composite Blinds also prevent damage to furniture, flooring, and belongings thereby protecting the durability of your home and reducing prematurely sending damaged products to a landfill.
- Composite Blinds carry a limited lifetime warranty. These blinds are designed, engineered and tested to ensure a long life, reducing landfill waste from short lived products.

Eco-Friendly Raw Materials

- The aluminum headrail and plastic components are 100% recyclable. Plastic components in Composite Blinds contain up to 50% pre-consumer recycled material.
- Corrugated cardboard is used to package all products and is 100% recyclable. The cardboard itself contains 35-40% recycled content. The angle board used to reinforce the cardboard is 100% recyclable and contains 80% post-consumer recycled material and 20% pre-consumer recycled material. Poly tubes, EPS pads, parts tub and bubble wrap used in packaging are also 100% recyclable.
- Custom box cutting machines are used to cut each box to the exact size of the blind. This process eliminates wasted cardboard, packing materials and shipping energy.

Green by Nature is Springs Window Fashion's commitment to the environment.

Graber is a brand of SPRINGS WINDOW FASHIONS the Best Experience Company
